Mercury Analysis Solutions from NIC

As the mercury analyzer global leader, Nippon Instruments Corporation (NIC), has designed and manufactured their advanced mercury analyzers for over 40 years, tirelessly working to become a trusted and recognized name in all applications of mercury analyzers.

<u>The Environmental Solutions Catalogue</u> provides a brief summary of the range of mercury analyzers that NIC offers for environmental applications.

In addition to the mercury analyzers for environmental applications, NIC also provides analyzers for many industrial applications ranging from crude oils to naphthas to LPG gas & more as listed in the <u>Industrial Solutions Catalogue</u>.
